June 19, 2008

Dear Valued Customer,

Update – Continued shortage of Organically Certified Wheat.

Due to a shortage in Canadian wheat production, Creative Salmon's feed manufacturer has continued to have problems sourcing Organically Certified Wheat for our feed formulations.

As a result Creative Salmon Company has had to supplement or substitute organically certified wheat with conventional wheat in our salmon diets.

With an unstable supply for the foreseeable future, Creative Salmon has modified its Feed Letter of Authenticity (attached) in regards to Wheat to:

“Wheat – is primarily certified organic wheat from Western Canadian prairies. Due to organic wheat shortages recently some regular wheat has been included in the manufacturing of this feed.“

We apologize for any inconvenience this may cause.

Our goal remains to provide you with a high quality product, while leaving behind the smallest environment footprint possible.

If you have any questions please contact me by phone 250 725 2884 or by e-mail at tim.rundle@creativesalmon.com

Kind regards

Tim Rundle
General Manager
